

KALIKOBASS II – 105” performance sloop

Designed and built for charter, Kalikobass II raises the standard for vacations under sail.

Two goals were set in the very first stage of planning Kalikobass II: full-on comfort for the most discerning guest and sailing excellence for her yachts-man owner. Come aboard. Experience the achievement of the dream

Simplicity, reliability and flexibility define her. Kalikobass II is agile, quick – achieving 15 knots in a 30 knot breeze. Fair lines and long waterline assure superb sailing performance.

Lounge on plump cushions. Savor long lunches. Linger with a glass of wine at sunset. The generous bimini-shaded cockpit has room for everyone.

Below Deck

Come below. The interior, lined with the cool simplicity of pale birchwood, offers escape from the heat of the day. Glove-soft suede seating in the saloon invites a recap of the day's adventures, games, a night at the movies, mellow music and fine cognac. The surround sound entertainment center with DVD, VCR, TV, CD and tape players meets your every mood.

Set with fine linens, china and crystal, the dining table becomes your private five-star restaurant, the menu inspired by your choice of cuisine and wines.

Excellent international and local cuisine will be specially tailored to meet your individual requests and considerations, all prepared by our gourmet chef.

Insulation and soundproofing between cabins, and between the saloon and galley (when the door is closed,) was designed to assure your privacy.

Each cabin has a complete entertainment center including DVD, VCR, TV, radio, and tape player plus a refrigerator, private safe, and individually controlled air conditioning.

En suite bathrooms for each cabin offer full showers with closing glass doors and a seat for your added comfort.

All dividing walls are insulated for sound proofing and privacy

The simplicity of Kalikobass II's staterooms conceals a flexibility bordering on the magical – with choices no other sailboat offers. Firstly, her en suite cabins can be configured as four identical kings or four cabins with twin singles.

With a bit of sleight of hand, the two forward cabins transform into a 22 ft by 24 ft (6.7 by 7.3 meter) stateroom with a centerline king bed, twin full baths and single berths on either side. Or, if you prefer, those two single berths convert into settees. Whether kings or twins, all berths are a generous 7 feet (2 plus meters) long. Kalikobass II meets your personal definition of comfort, whatever that may be.

Kalikobass II is the only sailing yacht (of any size) offering the alternatives of 4 king size berths, 8 twin berths, or a suite with one king and two twin berths/settees and two full baths.

Access to the water, via the staircase transom, is easy for all ages. Snorkelling, sea kayaking, water skiing, and sea biscuit – all the toys are here.

Deck spaces are vast and uncluttered. The perfect spot for sun bathing? The deckhouse roof, where the built-in cushioned mattresses and plush towels await. A cool drink is just a request away.

To assure your complete privacy the crew accommodations are located aft off the saloon along with the engine room, galley and navigation station.

Your dreams have a magical form all their own. Come, let Kalikobass II give them life.

KALIKOBASS II

Built 1998, Refitted 2004
LOA 104' (31.8m)
Beam 23' (7.4m)
Draft 12.5' (3.4m)
Displacement 85 tonnes
